St. Loni Ligori, Ap 26, 1052, Tirane, Albania

About me: An enthusiastic Software Developer, mainly focused in .NET technologies, constantly pushing myself harder to improve and make a difference in the Computer Software Industry.

WORK EXPERIENCE

15/03/2021 – CURRENT – Tirana, Albania
SOFTWARE DEVELOPER – S2 GLOBAL, AN OSI SYSTEMS COMPANY

Working with a team of 4 developers in designing and developing high availability cloud services and platforms.
Maintaining an ongoing Learning Management System, developed a new SSO application using Identity Server 4, and integrating other company software with the new Identity Application using Authorization Code Flow with Proof Key for Code Exchange (PKCE).
Main tasks I am involved currently:
- Developed SSO application using Identity Server 4 and integrated existing applications into SSO client with PKCE flow
- Developed new features and modules in a Learning Management System using .NET Core and Angular Js
- Added support for multiple languages for Identity Application using .NET Localization
- Added RabbitMQ publish/subscribe pattern for exchanging messages between application
- Implemented design patterns, Abstract Factory, Factory Method, Singleton, Repository etc.

10/12/2019 – 08/02/2021 – Tirane, Albania
SOFTWARE DEVELOPER – SOFT&SOLUTION

Focused on developing Web Applications as a Full Stack Developer, involved in the development of multiple Government Web applications, as well as private client applications. I worked with different technologies and with a team of 4 developers, handling tasks and projects with accuracy and efficiency, so the projects could be delivered before deadline. I worked on couple of projects as a lone developer for an internal chat application using .NET Core and SignalR for real time communication between team members, and developed and Xamarin mobile application for online elections.
Main tasks as a Software Developer:
- Designed and developed functionalities on web forms applications.
- Developed and maintained multiple web and mobile applications using .NET technologies for the Government.
- Developed a real-time internal chat application with .NET Core and SignalR.
- Created stored procedures to access data in the database.
- Developed functionality to generate statistical reports on a pharmaceutical Web application.
- Created database triggers Microsoft SQL Server.
- Created a Restful API to access the database from a Xamarin mobile application.
- Created a Xamarin mobile application for both android and IOS operating system for online elections voting

Technologies used: .NET Core, .NET MVC, C#, SignalR, JavaScript, SQL Server, Razor View, Xamarin

10/09/2019 – 09/12/2019 – Tirane, Albania
FRONTEND DEVELOPER – SOFT&SOLUTION

I was part of a team with 5 other developers. Our main responsibilities were to design and develop razor views for our .NET web applications, maintain and create new web pages using WordPress.
We were dedicated to applying principles of agile management to project and task, using Scrum methodology to define the development process of our applications.

Main task I was involved as a Frontend Developer:
- Created and maintained a large number of WordPress websites.
- Created a new mobile homepage for my company softsolution.al
- Added the ability of online payment with credit and debit cards for an WooCommerce website.
- Created views for different web application using razor views.
- Maintained Linux servers for our WordPress sites.

10/08/2019 – 09/09/2019 – Tirane, Albania
INTERN – SOFT&SOLUTION

Worked with Software Development department to identify and fix some existing issues on web based applications.
I was involved in a pair programming different colleges in the Software department to get and share knowledge with more experienced developers on the team.
Main tasks I was required to do:
- Learn Frontend Development using HTML5 with CSS and Javascript
- Learn Software Development using C#, .NET Framework and Razor Views
- Created a simple page using Razor View for a .NET Web Application
- Created a responsive view which contained an invoice on the left and a section with input fields and a button to add data to the invoice. Then after the invoice was filled with data it could be printed into PDF.

EDUCATION AND TRAINING

10/10/2017 – 10/08/2020 – Sq "Nene Tereza", Tirane, Albania
BSC IN COMPUTER ENGINEERING – Polytechnic University of Tirana

COMMUNICATION AND INTERPERSONAL SKILLS

Willingness to learn

Since programming is my profession and at the same time, my hobby, i am always looking for more knowledge when it comes to IT.

Fast learner

One of my greatest strength is the ability to learn a new thing in a short amount of time, which gives me the flexibility when it comes to software technologies.

DRIVING LICENCE

Driving Licence: B
